

Workshop 3

Sources of Social Prescribing and Health & Wellbeing Funding

- Vital that VCSE organisations taking referrals and delivering health and wellbeing outcomes are funded. Small amounts go a long way and evidence of VFM is mounting
- Funding needs to follow the patient but maintain our independence and ability to deliver patient-centred outcomes
- Who are you helping and what difference are you making? Focus on the outcome and consider the client group you are working with.
- Increasing emphasis on tackling inequalities and supporting those with protected characteristics or whose voices are seldom heard and who are underrepresented
- Collect data & report, publicise and showcase what you do. Community Research is invaluable and can unlock new funding opportunities with universities and others
- Consider partnerships and collaborations. Is your scheme unique or do others deliver similar in the same or in other areas. Can we help raise the profile and create a network of similar interventions?
- Use your local CVS experts – Grant Finder and Funder Finder services, bespoke searches and bid writing support <https://www.hampshirecvs.org.uk/>
